

Lawler Series 9200 Thermostatic Control Assembly For Photographic & X-Ray Developing

This unit consists of one Lawler series 9200 thermostatic mixing valve with sliding parts of stainless steel actuated by a liquid-filled hydraulic thermostat. The mixing valve is to have integral shut-off and is to be adjustable between all cold and 105°F temperatures.

The assembly consists of screwdriver operated combination stop and check valves with removable strainers on the inlets, a volume control, vacuum breaker and dial thermometer on mixed water outlet.
