High Capacity Mini Tempered Water Mixing System with Recirculation and Smart Pump

 ASSE 1017 Approved

 ASSE Lead Free Certified  Certified to CSA B125.3

Mixing valve shall be incorporated into a completely assembled and tested pre-piped manifold system which includes a B+G EcoCircXL N55-45 (1/2hp, 208-230v/1/60), circuit setting balancing valve, thermometers, ball valves, mounting strut, and test connection.

High Capacity water mixing valve shall be of the thermostatic type with liquid-filled thermal motor. It shall have bronze body construction with replaceable corrosion-resistant components. Valve construction shall employ a sliding piston control mechanism. Sliding piston and liner shall be of stainless steel material. Valve shall come equipped with union end stop and check inlets with removable stainless steel strainers. Valve shall provide three way protection against hot or cold supply line failure and thermostat failure. Valve minimum flow is 5 GPM (19 LPM). System minimum flow is 1/2 GPM when properly installed.

TEMP. RANGE	SET POINT	
70° to 100°F	80°F	<input type="checkbox"/>
90° to 120°F	110°F	<input type="checkbox"/>
110° to 140°F	130°F	<input type="checkbox"/>

CAPACITIES - HC MINI
